Project Name	AI StudyBuddy
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Discovery & Registration	Stage 2: Upload & AI Generation	Stage 3: Review & Exam Preparation
Actions — What does the customer do?	- Discovers AI StudyBuddy platform - Registers with name, email, password - Logs in and receives JWT tokens	- Uploads study material (.txt/.md/.pdf) - Requests AI summary of uploaded material - Generates flashcards and MCQ quizzes	- Reviews AI-generated summaries, flashcards, quizzes - Follows the personalized study plan day by day - Re-generates content for additional subjects
Touchpoint — What part of the service do they interact with?	- POST /api/auth/register - POST /api/auth/login - JWT token authentication	- POST /api/materials/upload - POST /api/materials/:id/summarize - POST /api/materials/:id/flashcards, /quiz, /study-plan	- GET /api/materials/:id - Revisits flashcards and quizzes before exam - Uses study plan schedule for time management
Customer Thought — What is the customer thinking?	"The registration is simple and quick" "My account feels secure with JWT tokens" "Let me try uploading my biology notes"	"The AI summarized 10 pages into bullet points in seconds!" "These flashcards cover the key concepts perfectly" "Now I can test myself with auto-generated quizzes"	"Everything is saved — I can revise anytime" "The study plan helped me stay organized" "I feel much better prepared for the exam"
Customer Feeling	Curious and hopeful 😊	Impressed and delighted 😄	Confident and relieved 😌
Process Ownership — Who is in the lead?	Authentication Module (authController)	Material & AI Module (materialController, aiController)	Data Persistence (MongoDB)
Opportunities — How can we improve this stage?	- Add social login (Google/Facebook) - Add email verification - Implement password reset	- Support image and audio file uploads - Allow batch processing of multiple files - Enable content regeneration with different parameters	- Add a frontend UI for visual interaction - Add progress tracking and analytics - Enable sharing study resources with peers
