

Project Initialization and Planning Phase

Date	29 September 2026
Team ID	6ab4ce760fc666a751b52130
Project Name	AI StudyBuddy
Maximum Marks	3 Marks

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A college student preparing for semester exams	Quickly understand and revise lengthy study materials	I don't have enough time to read through all the chapters and extract key points manually	The volume of study material is too large and exams are approaching fast	Overwhelmed and anxious about missing important topics
PS-2	A student who learns through active recall	Create flashcards from my study notes for quick revision	Making flashcards manually is repetitive and takes hours away from actual studying	Each chapter requires dozens of Q&A cards and I have multiple subjects	Frustrated that I spend more time on preparation mechanics than actual learning
PS-3	A student preparing for competitive exams	Test my understanding with practice MCQ quizzes	There are no easy tools to auto-generate quiz questions from my own study material	Creating quality multiple-choice questions requires expertise and significant effort	Uncertain about my level of preparedness for the exam
PS-4	A self-learner with limited study hours	Organize my study schedule into a structured day-by-day plan	I don't know how to prioritize topics or allocate time effectively across subjects	Every student has different goals, available hours, and material to cover	Stressed and directionless without a clear study roadmap
PS-5	A student using multiple study tools	Store all my AI-generated study resources in one secure place	My summaries, flashcards, and quizzes are scattered across different apps and platforms	There is no single centralized platform that provides all these AI features together	Disorganized and inefficient in managing my study resources
